## Company profile:

### Distributor

## Company activity:

## Company description:

CliniSciences commercialises reagents (antibodies, recombinants, ELISA kits, RNAi, cDNA clones, probes, PCR/qPCR reagents...) to diagnostic and research labs. As very dynamic company, we do our best to be close to our customers' needs in terms of high quality reagents that we propose and in terms of service that we provide (search for a particular antibody, technical support, delivery time, etc.)

Our principal assets for better serving you : adaptability, flexibility, reactivity and naturally the competence of the technical specialists at your service.
