Company description:

Rusbiolink - products and services for research

Rusbiolink company engaged in supply of reagents, consumables and equipment, mainly for biological laboratories. In addition, we offer other services: arrange the contract works, advise, assist in the commercialization of products and services to our clients.

We are focused on high-tech goods and services with the best ratio of efficiency, quality and price. Our suppliers - market leaders and promising companies that offer high quality products and services, both unique and widely distributed, but with an excellent price / quality ratio.

Rusbiolink is active since 2004. Our office is located in Moscow, but we work throughout the country, what help us representatives and partners in the centers of the Russian biological science: Saint-Petersburg, Novosibirsk and Vladivostok. Our motto is to work with clients - close cooperation, based on the competence and friendliness.
