Title

Life Sciences Call 2012 "Food and Nutrition"

Start date: Wed, 2012-02-01

[2] Budget: 3 million

Deadline: Thu, 2012-05-31

Technical Call:

Universities and non-university research institutions as well as scientists and researchers in Vienna, including researchers moving to Vienna as a result of this call,

- that would like to investigate a multi-annual (2-4 years) scientific research project building on a clear hypothesis.
- Proposals must address substantial scientific research questions that aim at advancing a rigorous understanding of nutrition and its implications on humans and animals.
- Proposals addressing scientific research questions with clear implications on food and feed safety, security and quality are also eligible.
- The impact on public health and practical implications for human and animal patients and individuals at risk are an important rationale for the call.
- In total 3 Mio. € are dedicated to this call. Funding range per project is 200,000 to 500,000 €.
- Young (according to academic age, starting at Postdoc level) and female scientists are especially encouraged to apply and act as Principal Investigators.
- Proposals can be submitted until 31 May 2012 at 2pm.
- Decisions will be made in late fall 2012.

Detailed information is available online at www.wwtf.at [3]

Specific Programme(s):

Theme:

Restrictions to Participation:

WWTF provides funding for scientific projects which should:

- be characterized by a well-defined scientific research programme in the field of Life Sciences
- be hypothesis driven aiming at advancing a rigorous understanding of the implications of human or animal nutrition

- have a catalogue of sound methods to address the research questions
- have a proposing team of researchers documenting a solid scientific track record according to academic age
- include a clear statement of the perspective for medium term economic and/or societal benefits
- last two to four years and be in the range of € 200.000 to € 500.000 of requested funding

Eligibility and Evaluation:

WWTF evaluation process:

- All projects submitted within the application deadline will first undergo a formal eligibility check by WWTF staff.
- Projects that do not meet the formal criteria will be rejected at this stage.
- The next step is a first qualitative screening by a broadly composed international scientific expert jury. Proposals not within the core of the Life Sciences Call 2012 and proposals that do not meet international quality standards, will be „C-listed“ by the jury and rejected at this stage.
- The remaining proposals will be assessed by at least two expert peers from abroad (applicants will be provided with anonymized written reviews after the funding decision).
- The most significant step in the assessment is, that all proposals are comprehensively evaluated in a jury meeting in Vienna on the basis of the written peer reviews and the jury's own expertise, resulting in a recommendation “to be funded” or “not to be funded” for each proposal.
- The assessment process (peer review and jury meeting) is completed by the formal funding decision of the WWTF Board of Directors. The decision is expected for late fall 2012.
