Title:

Test reagent development and production

Keywords:

Description:

A UK company develops and manufactures in-vitro test kits for clinical laboratories, veterinary practice, environmental protection, and food safety. They develop new technologies and reagents and can customise products to meet users requirements. They are keen to discuss research or technical cooperation agreements and commercial agreements with technical assistance. The company is also willing to discuss distribution and subcontracting proposals.

The company has many years experience with in-vitro test kit development and production and is certified to ISO 9001:2008.

They specialise in the following areas:

ELISA (Enzyme Linked Immunosorbent Assay) test kits for Allergies, Food Safety, Infectious Diseases, Tumour Biomarkers.

Rapid Test Kits for Cardiology and Infectious Diseases.

CLIA (Chemiluminescence Immunoassay) Test Kits for Thyroid and Tumour Biomarkers.

Drug abuse Test Kits.

Many Veterinary ELISA and Rapid Test Kits.

Dry Chemical Reagents.

Of particular interest are new products the company has developed for human and veterinary testing:

For humans their new Procalcitonin (PCT) test is ideal for sepsis and bacterial infection diagnosis.

A new combined ELISA and IFN- γ Release Assay Test Kit is designed for TB diagnosis.

New Rapid Cardiac Marker Tests quickly identify cardiovascular diseases.

For cattle the company has just developed a new *Leptospira Hardjo* ELISA Test Kit to aid Bovine Leptospirosis control.

Stage of development:

Already on the market

Key Benefits:

Innovative, high quality and cost-effective diagnostic reagents with the sensitivity, specificity and reproducibility essential for modern laboratories.

ISO 9001:2008 accredited.

Tests can be adjusted to suit a client's requirements.

Very strong veterinary arm to the company covering Bovine/ Sheep/Goat ELISA testing and Feline/Canine/Avian Rapid testing.

Early diagnosis and clinical decision making can result in more effective therapy and often treatment cost savings.

Applications:

Patent status:

Commercial Partnering:

The company is seeking cooperation with clinical laboratories, food safety laboratories, veterinary laboratories, research organisations and commercial companies involved in human and animal in-vitro testing. The company can develop customised in-vitro testing products or supply standard or modified products as required.

They are also interested in technical or research cooperation agreements and are open to proposals regarding distribution, subcontracting or other commercial collaboration.
