European Antibody Congress 2015

Description

European Antibody Congress 2015

Discover, develop, get to market

The largest antibody event focused on getting important new therapeutics and immunotherapies from the bench to the clinic. Taking place on 9-11 November 2015 at the Congress Centre in Basel we will explore where antibody drug development is headed in the future. Co-located with the World Biosimilar Congress and HPAPI congress participants can meet and do business with over 600 representatives across all 3 conferences from big pharma, biotech, investors, clinicians and researchers.

Partnered with the City of Basel and i-net, and now in its 11th year the European Antibody Congress is bringing together 400 delegates from big pharma, biotechs, clinicians, researchers and innovative start-ups for 3 days this November. They will be gathering to develop new strategies and partnerships to advance antibody drug discovery, development, and commercialisation.
