6th World Bispecific	Description
----------------------	-------------

6th World Bispecific

Website

[6th World Bispecific](#) [2]

Attend World Bispecific this year to:

1. Effectively validate synergistic targets with insight from Roche's novel potent CEA targeting T cell bispecific for the treatment of solid tumors
2. Optimize bispecific development by taking back lessons learned for greater specificity and stability with Glenmark Pharmaceuticals
3. Improve efficacy during preclinical development to predict clinical performance with insights from the development of Amgen's AMG-330
4. Maximize manufacturability of your bispecific by learning of the latest purification chromatography technologies to reduce production aggregation with Eli Lilly
5. Calculate toxicity liability of bispecific formats with preclinical PD, PK and safety evaluation insight from Genentech
6. Guarantee clinical success - confidently select patients using clinically predictive biomarkers by following AbbVie's approach to clinical trial design of ABT-981

This is only scratching the surface of how the 27 sessions will help you deliver better bispecifics into the clinic and ultimately to market.

2015 is a pivotal year for realizing the next generation of bispecific drugs so ensure you are part of the conversation and attend World Bispecific.

Country	Start date - End date
