Company profile:

Manufacturer
Research & Development
Contract research

ISO certifications:

ISO 9001
ISO 13485

Company activity:

ELISA, Immunocapture, Immunoturbidimetry, Native and recombinant proteins, Monoclonal and polyclonal antibodies, qPCR, Endotoxin-removal products

Company description:

BioVendor – Laboratorní medicína a.s., through its three divisions, produces and distributes medical equipment and medical research products for both the Czech Republic and international markets. It also works in close cooperation with Siemens Medical Solutions Diagnostics, a globally respected supplier of immunodiagnostic systems. Maintaining a high standard of customer support services, including training and consultancy, is a matter of course for us.

Wherever reliable products and quality service are required in healthcare, BioVendor – Laboratorní medicína a.s. is there, working hard to ensure the maximum level of satisfaction for its clients. An in-depth knowledge of clients' needs coupled with our ability to call upon our wide international experience are just some of the many advantages our clients have come to appreciate.

Our efforts in raising the standards of healthcare are performed by the following three divisions:

Research & Diagnostic Products Division

Established in 1995 as a small R&D laboratory of the Czech company BioVendor – Laboratorní medicína a.s. (Est. 1992), the Research & Diagnostic Products division has grown to become an innovative biotechnology company focused on developing and manufacturing in vitro diagnostic and for-research-use immunoassays, antibodies and recombinant proteins.

BioVendor's R&D efforts are aimed at rapidly growing fields of interest within the international research and diagnostic community, such as Obesity/Metabolic syndrome/Diabetes, Cardiovascular physiology, Renal disease and injury, Bone metabolism/Osteoporosis, Infection/Inflammation, Oncology/Tumor markers and more.

Our products are the result of long-term R&D activities, based on the capability of our research professionals to set new targets and to develop and manufacture new products, some of which being unique in the world, or being the first commercial assays, recombinant proteins or antibodies available on the market.

Our demanding customers include many of the world's top ranking scientific institutions. As a result, we have opened branches in Germany and the USA (2003 – 2004) and in China (Hong Kong and Guang Zhou, 2006), to expedite distribution and improve our customer service.

BioVendor – Laboratorní medicína a.s., is EN ISO 13485:2000, ISO 9001:2000 and ISO 14001 certified, assuring that the development and manufacturing processes of all our products meet all quality control as well as environmental management criteria required.

Laboratory Medicine Division

World-class diagnostics

We offer a complete range of products for in vitro diagnostics, from immunochemistry through clinical biochemistry, hematology, microbiology, molecular biology to pathology. Thanks to our close cooperation with Siemens Medical Solutions Diagnostics, we are able to offer a complete line of automated laboratory diagnostic products. Our specialized consultants provide solutions designed to meet the specific needs of each laboratory. The high level of certification held by the company both reflects and guarantees the high standard of service we provide.

Clinical Products Division

Reliable medical devices and instruments to meet your needs

The knowledge we have acquired through many years of activity in the field of laboratory medicine and research has been directly applied in selecting our lines of clinical products. The devices and instruments for diagnosis and treatment that we distribute are continually tested in medical practice by professionals around the world. Each manufacturer's product that we distribute has been thoroughly tested so that the x-ray devices, ultrasound systems, monitors, EEGs and ECGs, ventilation systems, endoscopes, surgical instruments, implants and other healthcare supplies we provide are of the highest quality yet at affordable prices.

Professional Consultancy Services

Should you need more detailed information about any of our products, please contact one of our specialists, who stand ready and will be pleased to answer all your questions. We welcome all types of enquiries. A high standard of customer support services is a matter of course for us.

Company specialty:

Developing and manufacturing of:

- immunoassays
- recombinant proteins
- antibodies
- qPCR
- endotoxin-removal products

Visiting address:

Address: Karasek 1767/1
Postalcode: 641 00
City: Brno
Country: Czech Republic

Phone nr. +420-549 124 185
