Job Title:

Proteomics Scientist - Proteomics Core Facility : Heidelberg

Organization/ Institution

Job description:

Job Description

The European Molecular Biology Laboratory (EMBL) is one of the highest ranked scientific research organisations in the world. The Headquarters Laboratory is located in Heidelberg (Germany), with additional sites in Grenoble (France), Hamburg (Germany), Hinxton (UK) and Monterotondo (Italy).

We are looking for a Proteomics Scientist to join the Proteomics Core Facility at EMBL Heidelberg. The Proteomics Core Facility provides scientific support in the areas of proteomics and structural biology for scientists at EMBL-Heidelberg and its outstations as well as for external visitors. The Facility offers services in the characterization and quantification of proteins and peptides by mass spectrometry, operating a range of state-of-the-art mass spectrometers and nano-flow liquid chromatography systems. The successful candidate will be involved in all aspects of sample preparation, analysis by LC-MS/MS and data interpretation. Close interaction with users and visitors of the Facility is an essential part of the job.
