## International conference on Cancer Diagnostic and Medical Treatment Approaches, 2016

### Description

ICCDMTA'2016

## International conference on Cancer Diagnostic and Medical Treatment Approaches, 2016

ICCDMTA'2016 aims at bringing together the professors, researchers, clinicians, educators, program developers to provide an international forum for the dissemination of original research results, new ideas and practical development experiences which concentrate on both theory and practices in our Medical meetings. The theme of the conference is around, "Cancer Diagnostic and Medical Treatment Approaches". Cancer is a malignant growth or tumour resulting from an uncontrolled division of cells. Cancer is the second most common cause of death in the European Union. Cancer of the breast and lung cancers are the leading cancer types in European males and females. The burden of new cancer cases in 2010 was estimated to be around 3 millions, in European countries to 53% of this load. The burden of cancer is increasing worldwide despite advances in cancer diagnosis and treatment. However, the worldwide cancer statistics depict that 14.1 million adults in the world were diagnosed with cancer and 1.7 million deaths occurred in 2012 in Europe and 7.4 millions globally.
